PROFESSIONAL SUMMARY

Computer Science student and motivated Full Stack Web Developer with strong skills in PHP, MySQL, HTML, CSS, JavaScript, and Bootstrap. Experienced in building database-driven web applications with clean and structured code, responsive UI, and backend functionality.

Developed projects using modern web technologies with AI-assisted tools for debugging, optimization, and productivity while maintaining full understanding of all implemented code.

Strong interest in web development and backend systems with a quick-learning, problem-solving, and team-oriented mindset. Seeking an internship or junior developer role in a software house to apply and further develop technical skills in real-world environments.

TECHNICAL SKILLS

Programming Languages:

PHP | JavaScript | MySQL

Frontend Development:

HTML5 | CSS3 | Bootstrap | Responsive Design

Backend Development:

PHP | MySQL | CRUD Operations | Session Handling

Tools & Technologies:

Git | GitHub | VS Code | XAMPP | AJAX (Basic) | WordPress

Concepts:

Database Design | REST Basics | Problem Solving | OOP Basics

EDUCATION

Bachelor of Science in Computer Science (BSCS)

6th Semester (Currently Enrolled)

Expected Graduation: 2027

Abdul Wali Khan University Mardan

PROJECTS

❖ Online Voting System

Developed a secure voting platform with admin and user roles. Implemented authentication, candidate management, and real-time voting functionality.

Tech Stack: PHP, MySQL, JavaScript, AJAX

❖ College Management System

Built a system for managing student records, faculty data, and course information with full CRUD functionality and database integration.

Tech Stack: PHP, MySQL, Bootstrap

❖ Online Quiz System

Created an interactive quiz application with timer, automatic scoring, and admin panel for question management.

Tech Stack: PHP, MySQL, JavaScript

EXPERIENCE

Full Stack Web Developer (Self-Learning / Academic Projects)

2025 – Present

- Developed multiple dynamic web applications using PHP and MySQL
- Designed responsive UI using HTML, CSS, and Bootstrap
- Implemented database CRUD operations and backend logic
- Improved debugging and problem-solving skills
- Practiced real-world project development workflow

KEY ACHIEVEMENTS

- Built 3+ full-stack web applications independently
- Strong understanding of database-driven systems
- Experience in frontend + backend integration
- Continues improvement through self-learning and projects
